

Driving Improvements in Lung Cancer Care

UNITED KINGDOM
LUNG CANCER COALITION

UKLCC Conference | 10 November | London

UKLCC is bringing a highly interactive lung cancer care conference to Mary Ward House, London this November. This event will focus on identifying the main elements currently limiting our ability to ensure best practice across the UK, and explore solutions to these key issues which can be scaled up and implemented across the UK.

This event will also focus on:

- Reducing inequalities of access to optimal and timely care
- Achieving universal access to rapid genomic laboratory testing
- Delivering rapid roll out of the 'Lung Health Checks' with transition into a national screening programme

Hosted by **Professor Mick Peake** and **Professor Robert Rintoul** this conference will feature succinct plenary presentations by key opinion leaders including **Dr Neal Navani, Dr Matt Evison, Dr Alastair Greystoke, Dr Craig Dyer**, and many more.

This is a multidisciplinary event and we welcome representation from anyone involved in the management and delivery of care to people with lung cancer.

Anyone working in the NHS can register for just £25.

Register now!

The UKLCC receives sponsorship to support its activities - see qrco.de/UKLCCSpon. Sponsors have had no input into the agenda of the conference nor the selection of speakers. Our primary consideration in any collaboration with sponsors is ensuring that our independence is not in any way compromised and we are free to act in the best interests of the lung cancer community both in terms of healthcare delivery and what we consider to be the best interests of people with lung cancer.

UK Lung Cancer Coalition (UKLCC) is a private company limited by guarantee without share capital and incorporated as a Community Interest Company (CIC) registered at Companies House (Registration Number 11914752).
