

UNITED KINGDOM
LUNG CANCER COALITION

What do the next 10 years hold for the UKLCC?

Prof Robert Rintoul

Celebrating 20 years of the UK Lung Cancer Coalition

Declaration of interest

- **Clinical lead UKLCC**
- **Advisory boards: Janssen; Olympus Medical**
- **Rintoul group funding: Asthma & Lung UK; Cancer Research UK; UKRI MRC; Owlstone Medical**

UNITED KINGDOM
LUNG CANCER COALITION

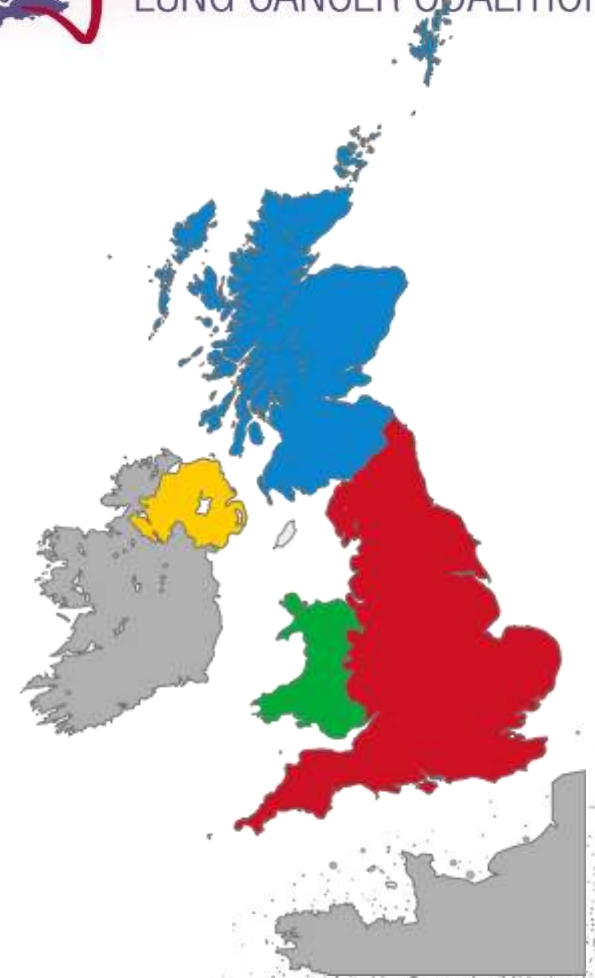

Thank you!

Celebrating 20 years of the UK Lung Cancer Coalition

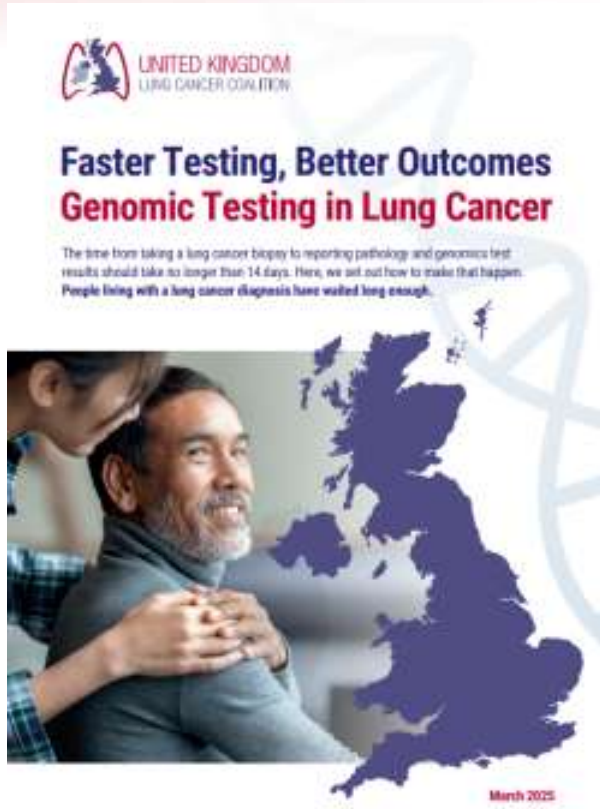

CT screening saves lives!

- **Continue to push for expedited roll out across England – concern about slipping behind 100% by 2030**
 - need to see a clear commitment in the National Cancer Plan
- **Support Welsh Government with their roll out plans**
- **Persuade Scottish Government to expedite their plans**
- **Support NI clinicians lobbying their administration**

Genomic testing

- Testing improving but remains variable across UK
- Affects up to 30,000 lung patients p.a.
- Waits of up to 4 weeks still commonplace
- UKLCC call of 14 days from biopsy to full results

Access to optimal care for all

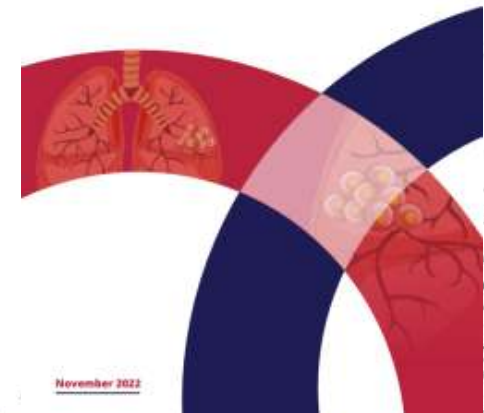

UNITED KINGDOM
LUNG CANCER COALITION

- 13 400 deaths p.a. linked to deprivation
- Incidence of lung cancer 2x higher in many deprived areas compared to least deprived
- **Equity of access to complex care for all**
 - Increasing disparities with increasingly complex treatments
 - Reduce variation in standard of care
- **Focus on rural and coastal communities**

BRIDGING THE GAP

The challenge of mitigating health inequalities in lung cancer

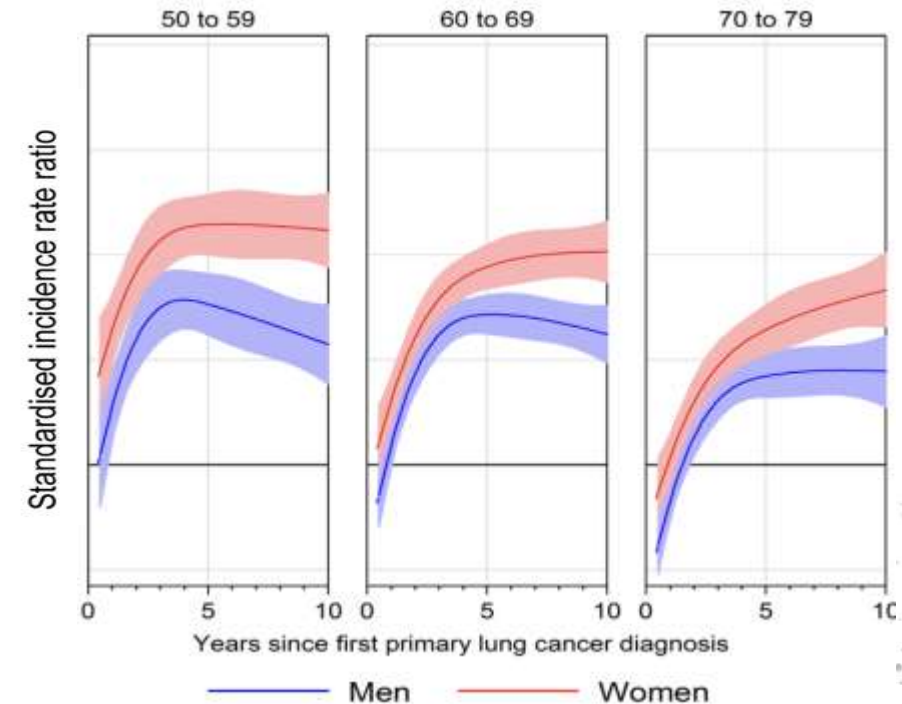

Focus on survivorship

UNITED KINGDOM
LUNG CANCER COALITION

- **Rapid increase in numbers of long-term survivors**
 - Post surgical or radiotherapy
 - Systemic therapies controlling disease
- **Survivors are at increased risk of developing second primary lung cancer**
- **1 in 8 will develop second primary lung cancer**
- **Risk for SPLC in never smokers is similar to ever-smokers**
- **Increased focus on holistic care of long-term survivors**
 - Recognition of and support for mental health

Barclay et al., 2019

Support workforce discussions

UNITED KINGDOM
LUNG CANCER COALITION

- Historically challenging to match; changing in many ways
- Clinical Expert Group has given some guidance on numbers
- Some areas particularly stretched; radiology; pathology; genomics; CNS
- Embracing new approaches to working – AI and education
- Getting right people doing the right job
- Pathway navigators are emerging and evolving

UKLCC regional meetings

Plan to run a series of *regional* meetings to hear about more local issues and solutions

UKLCC supporting Dr Wendy Anderson running NI Lung Cancer Conference in Belfast on November 20-21

Would you like to help UKLCC with a regional meeting?
